About Me

Passionate software developer ready to apply modern web technologies to real-world challenges while learning, improving and contributing to high-quality software solutions.

Skills

• JavaScript, TypeScript, HTML5, CSS3, Tailwind, React, Angular, Redux, RxJs
• Node.js, Express, MongoDB, Firebase
• Git, GitHub, Jenkins, GitHub Actions, REST APIs, Unit Testing, CI/CD, Agile

• Analytical and algorithmic thinking
• Strong sense of teamwork and collaboration
• Desire to learn and grow continuously
• Fast adaptation to new technologies

Languages

- English - fluent
- German - intermediate
- Bulgarian - native

Experience

- **ClearTerms AI — Serverless Full-Stack Legal-Tech App** GitHub Website 2025

  Built with React, Vite, TypeScript, and Tailwind, integrating Vercel serverless functions with Gemini 2.5 Flash for real-time AI processing. Features advanced text preprocessing (normalization, noise reduction), multi-format document import (PDF/DOCX/URL), and regex-based risk detection. Deployed on Vercel with a secure, scalable, and fully responsive architecture — delivering AI-driven Terms & Conditions summarization, automated risk tagging, and intelligent question answering.

- **GreenRide — Full-Stack Eco-Driven Ride-Sharing Service** GitHub Website 2025

  Built with React, TypeScript, Vite, styled-components, Redux Toolkit, React Query, Node.js, Express, and MongoDB (Mongoose) featuring secure cookie-based JWT authentication. Implements eco-impact analytics that calculate real-time CO_2 savings, updating driver and passenger achievements dynamically. Features ride discovery, publication, and booking flows with accessible, mobile-responsive design. Frontend deployed on Vercel and backend on Fly.io — delivering a full-stack platform that reduces carbon emissions and promotes sustainable travel.

- **StudyHub — Full-Stack Productivity Platform for Students** GitHub. Website 2025

  Built with Angular, TypeScript, Firebase (Authentication & Firestore), and RxJS, using a signal-first reactive architecture, lazy-loaded modules, and standalone modular components. Implements a fully responsive UI with route guards and dynamic Firestore streams. Features intelligent task management, interactive study pages, a public hub for shared content, and a Pomodoro-based focus room — deployed on Firebase to deliver a cohesive productivity platform for structured, focused learning.

- **Lexium — Digital Workspace for Law Firms** GitHub Website 2025

  Lexium is a platform for managing law firms' internal workflow, built with React, TypeScript, Vite, styled-components, Redux Toolkit, React Router and Firebase (Authentication, Cloud Firestore, Hosting) — providing firm-specific workspaces for cases, hearings and tasks, dashboards for tracking workload and progress, an upcoming hearings schedule, and a public catalogue of anonymised case summaries with granular visibility controls.

Education

- **Professional Degree in Software Engineering - Software University, 2024 - 2025**
  - **ReactJS:** JSX, Components, Forms, Routing, React Hooks, Authentication, Advanced Techniques, Unit Testing, E2E Applications
  - **Software Engineering & DevOps:** Implemented Agile/DevOps with Git, automated testing, and CI/CD using GitHub Actions & Jenkins.
  - **Angular:** Built apps with TypeScript, components/modules, RxJS; implemented routing, forms, and state management.
  - **JS Back-End:** Built Node.js/Express.js APIs with MongoDB; added authentication, validation, and error handling.
  - **HTML & CSS:** Built responsive static sites with HTML, CSS, Flexbox; focused on layout, typography, and forms.
  - **JS Applications:** Built SPAs with JavaScript, REST, async code, client-side rendering, routing, and modular architecture.
  - **JS Advanced:** Applied DOM manipulation, classes, OOP, events, error handling, and unit testing.
- **CS50: Introduction to Computer Science — Harvard University (edX), 2024**

  Gained foundations in algorithmic problem-solving, abstraction, data structures, resource management and software engineering using C, Python and JavaScript
- **Master of Law (LL.M.) - Sofia University "St. Kliment Ohridski", 2016 – 2021**
